CONTROL_

Konica-Minolta mn87362a2 Proof 1

design that attains your goals and keeps you
ahead of competitors.

- connects everyone with fast access to more power and productivity.
- communicates in high-speed, high-impact color and cost-effective B&W.
- controls the flow of information with greater ease, speed and security.

design that replaces your current equipment with
a full-color, full-function central document resource
to save you time and money.

business your way. business that works.
business by design.

business by design ...with **bizhub color.**

CONNECT COMMUNICATE CONTROL

Design for universal access. In compliance with Section 508, the control panel tilts and rotates left or right to accommodate wheelchair access. Everyone will benefit from blue LCD function key lights and a bigger touch-screen that are easier to see – and paper drawers that slide open more smoothly.

Design to simplify operation. A large, high-contrast 8.5" color LCD touch-screen control panel provides simple icons and intuitive menus. Short-cut keys let you customize commands to speed your workflow. You can even preview and enlarge multiple page thumbnails.

▶ **High-productivity bizhub OP.** Konica Minolta's proprietary bizhub OP (Open Platform) control system adheres, adapts and expands to the needs of your growing IT infrastructure. To keep you connected, bizhub OP is a real design advantage.

▶ **Integrated bizhub Architecture.** Major functions are consolidated in uniform processing modules for smooth, consistent operation and security – reducing the need for operator training.

▶ **Powerful Emperon® printing.** The Emperon Print System is built in, with Vista drivers and PCL6, PS3 emulations and XPS for print functionality right out of the box – powered by a 1 GHz CPU.

▶ **The bEST approach to integration.** With built-in bizhub Extended Solution Technology (bEST), your system is ready for a seamless interface with third-party software for print management, cost control and networking functions.

design to connect: bizhub C203/C253/C353

With bizhub® design, everyone stays connected – CEO's to interns, vendors to clients, headquarters to branch offices. Small footprint and 360° access earns bizhub a place at the center of your office, with cords hidden out of sight so it looks good from any angle. And bizhub OP connects form, function, style and productivity – with built-in print control, uniform interface that makes every operator an instant expert, and seamless third-party software integration.

bizhub C203

bizhub C253

bizhub C353

One size fits all? Not in today's world – so bizhub color comes in models designed to fit your business. With bizhub C203, small to mid-sized businesses have 20 ppm color and B&W print/copy output to keep work flowing. The bizhub C253 increases your output speed to 25 ppm in both color and B&W – and bizhub C353 outputs color and B&W documents at up to 35 ppm, so heavy traffic won't compromise your ability to get work done.

Connection begins with the InfoLine. Status lights follow the flow of information in and out, so you can see what's happening at a glance: message transmission and reception, device operating status, maintenance alerts and more.

Design for easy loading. Easy-grip handles preserve clean bizhub lines and allow drawers to glide open with just a light touch – loading up to 1,150 sheets in standard configuration, with 500-sheet cassette plus storage drawer option, dual 500-sheet cassette option and a 2,500-sheet Large Capacity Cassette option that raises capacity to a maximum of 3,650 sheets.

Design to protect the environment. On planet Earth, we're all connected – so bizhub provides new power and toner saving modes, low-temperature fusing that saves energy, and other "green" technologies that surpass even the stringent new Energy Star standards.

- ◆ **GoGreen Award.** The Konica Minolta practice of assessing environmental impact throughout the full life cycle of each product recently earned us the "GoGreen Company of the Month" Award from Spectrum Magazine.

Easy-access paper handling. While your bizhub is scanning at high speed, a powerful Auto Document Feeder simplifies the process of loading and unloading originals. Its gray grooved plastic tray makes paper easier to see and pick up – and its ergonomic shape delivers scanned originals below where they're easier to reach. Result: bizhub design that's a pleasure to use.

High-speed scanning. All three bizhub models let you scan documents at up to 70 originals per minute – more than a page every second. You can Scan-to-Email, attaching documents as PDF, JPEG, TIFF or XPS files. Scan-to-FTP, for quick access via any PC on your network. Scan-to-SMB, sending files to shared folders on desktop PCs. Perform TWAIN scanning from PCs. Even Scan-to-WebDAV, to manage files and folders on a web server – or scan to a USB device for portable storage.

design to communicate: bizhub scanning & sharing.

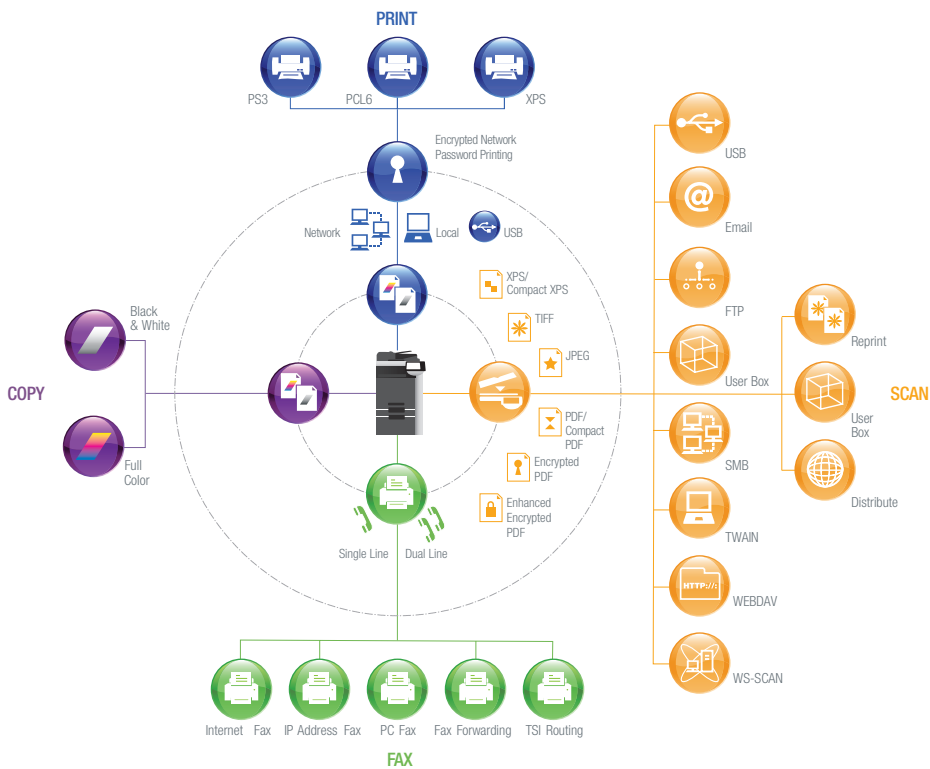

With bizhub® design, you'll have more power to communicate – moving more information more quickly to more destinations. Breaking down barriers. Scanning, storing and sharing with effortless flexibility, including the power to distribute simultaneously to multiple destinations. Backed by the power of PageScope® software solutions that communicate effortlessly with your existing network, for device and document management that can revolutionize the way you do business.

Enhanced User Box functions. Scan-to-User Box lets you save files on a built-in 60 GB hard disk drive. You can assign User Boxes to individuals, departments or workgroups, even allocate User Boxes by theme, project or goal to share and group documents more efficiently.

Scan Annotation for document ID. Documents stored in the Annotation User Box will be automatically numbered and identified for document management purposes.

Fast distribution with bizhub Send. The new scanning feature that lets you accomplish more with less keystrokes – scanning, Emailing and faxing while simultaneously storing a file to a User Box, SMB, FTP or WebDAV Server.

▶ **PageScope Enterprise Suite*** (optional) addresses the management needs of your Konica Minolta devices with a server-based accounting solution that provides user authentication capabilities as well as a custom display panel based on individual user log-in.

▶ **PageScope Account Manager** tracks bizhub activities on a per-page basis for color and B&W based on individual users.

▶ **PageScope Authentication Manager** provides secure password-protected log-in with multiple methods of authentication.

▶ **PageScope MyPanel Manager** customizes your bizhub display based on user log-in at any MFP on your network.

▶ **PageScope Net Care Device Manager** monitors Konica Minolta MFPs as well as devices from other manufacturers on an IT management network from a central location.

▶ **PageScope Web Print Assistant** enables you to print documents from Internet websites without cutting off the right edge of the page.

▶ **PageScope Log Management Utility** maintains an offline log of your system activity.

▶ **PageScope Data Administrator™** manages device user lists, enables account tracking, sets up one-touch Email addresses and manages password and security functions.

▶ **PageScope Web Connection** gives each bizhub its own "website" for status monitoring.

CONNECT _ COMMUNICATE _ CONTROL

Compact PDF for smaller file size. With bizhub scanning, you create high-quality color document files that are smaller in size – and faster to send and receive.

Communicate via USB transfer. A simple EK-603 USB Interface option lets you scan files to a USB thumb-drive and also print files from a USB thumb-drive – including files in PDF, Compact PDF, JPEG, TIFF, encrypted PDF, XPS and Compact XPS formats.

WebDAV: communicating with your server. Your bizhub also provides support for WebDAV (Web-based Distributed Authoring and Versioning) – the advanced system that makes it easier to manage files and folders on your web server, identify authors and dates of web pages, lock documents and track file revisions.

WS-Scan: Windows Vista scanning. Push and Pull scanning using DPWS (WSD) Protocol. Supports XPS, JPEG, BITMAP, PNG and TIFF file formats.

IPv6: the next-generation Internet protocol. IPv6 dramatically increases IP addressing power and gives every networked device its own IP address to facilitate communication and improve security.

High-volume fax communication. For all-in-one functionality, the C353/C253/C203 Fax Kit option provides direct faxing from your PC, IP Address fax capability, TSI routing, 2,000-location address book, broadcasting and program dialing – and the optional ML-501 Fax Multi-Line Kit adds a second phone line to double your input/output traffic.

* Available Spring 2008

▶ **PageScope Print Status Notifier** tells you that your bizhub print job or network fax has finished, if paper has run out or toner needs replacing.

▶ **PageScope Box Operator** allows you to download and access scanned or faxed data stored in User Boxes from your PC.

▶ **PageScope Workware™** (optional) makes it easier to manage documents, merge documents, view thumbnail images, link files and convert formats.

CONNECT COMMUNICATE CONTROL

Spectacular color image quality. Simitri® HD Color Polymerized Toner gives bizhub documents high-impact, high-definition color – sharper text and fine detail, smoother gradations, richer tonality, superior color graphics and halftone reproductions.

Color that won't fade, peel or crack. Oil-less toner fusing at lower temperatures gives you color prints and copies that resist fading – and low-gloss finish lets you fold, overprint or write on prints and copies with no compromise in quality.

The paper you need to get the job done. With 1,150-sheet standard paper capacity, 500-sheet plus storage drawer option, dual 500-sheet cassette option and a 2,500-sheet Large Capacity Cassette option, you'll have maximum paper capacity of 3,650 sheets – plus the ability to print and automatically duplex 140 lb. index stock, print on 12" x 18" paper to preserve crop marks and borders, standard duplexing at full rated speed and a 150-sheet bypass for specialty paper, envelopes and transparencies.

Better ways to manage color. The Emperon Print System provides color management with ICC Profiles – and the bizhub C353 and C253 also let you add a powerful Fiery® IC-409 Image Controller option for sophisticated in-house color production. Fiery Command Workstation™ interface allows you to control job functions from remote PCs, preview thumbnails, maintain and update archives, create job logs and more – and Fiery ColorWise® Pro tools let you adjust colors, control RGB and CMYK independently, match samples, edit simulations and output profiles.

design to control: bizhub output, access and security.

With bizhub®, you're always in control – improving your image, increasing your output, and expanding your system with printing, finishing and access options that grow with your business. In-house and on-demand, your bizhub can handle reports and presentations, forms and human-resource documents, flyers and finished booklets. You'll have more ways to maintain security – and you can add system enhancements that increase your productivity.

Modular finishing options.

Versatile, scalable finishing options include a built-in modular finisher with sort, group, staple, hole-punch and 60-page crease-folded booklet capabilities, plus a powerful floor finisher that provides sort, group, staple, hole-punch, 60-page folded booklet-making and half-folding (See General Specifications for details).

Industry-leading security protection: At every stage of your information workflow, bizhub is designed to meet today's most stringent security precautions and regulations.

Encrypted Network Password Printing: Create your own encryption passphrase to protect authentication credentials.

Encrypted PDF files: Automatically create an encrypted PDF file during scanning, so confidential data is protected as soon as it enters your workflow. In addition to the standard PDF encryption capability, the LK-102 will allow you to encrypt your PDF with an even higher security level.

IP Filtering: Registers the IP addresses of PC's that are allowed access to your documents.

SSL/TLS Encryption: Protects data during exchange from bizhub to LDAP servers and PageScope programs.

S/MIME Encryption: The Secure Multipurpose Internet Mail Extensions encryption standard that protects Email exchanges.

HDD Lock: Applies password-protection locking to the hard disk drive of your bizhub, preventing it from being read even when removed from your device or any other bizhub.

ISO 15408 EAL 3 Certified System Security: Konica Minolta's Target Of Evaluation (TOE) for ISO 15408 certification applies to the entire MFP, providing system-wide, end-to-end security.

Security authentication options. The optional AU-101 Biometric Authentication Unit recognizes users based on scanning finger vein patterns for secure MFP Access and "ID and Print" operation. The optional AU-201H HID Authentication Unit* lets you use familiar HID Proximity cards for fast, secure access to bizhub printing, copying and scanning – and supports Windows Active Directory integration via PageScope Enterprise Suite* for simplified authentication and account tracking increase productivity and reduce costs.

Job erase without a trace: After every job, your bizhub can automatically overwrite your HDD up to three times – deleting any trace of job data in compliance with U.S. military standards for the Army (DoD 5220.22-M), Navy (NAVSO P-5239-26) and Air Force (AFSSI5020).

Advanced copy protection: Prevents re-copying of documents with a selection of concealed watermarks to identify printouts as reprints with hidden messages such as "Confidential" that only appear upon re-copying – no matter which device is used to re-copy.

HDD sanitizing: Before moving, re-using or disposing of your hard disk drive, HDD Sanitizing can overwrite data in 8 different modes to comply with 11 U.S. military and international security standards – including seven-times overwrite protection (AFSSI5020).

bizhub Secure Print: Lets you set password security locks in place on sensitive documents such as job estimates, employee evaluations, salary reports, business forecasts and sales figures.

User Authentication: Custom-selectable for printing, scanning, faxing and User Box functions – with users identified based on up to 20 Active Directory, NTLM V1 or V2, NDS and LDAP Servers or built-in bizhub authentication functions.

i-Option™: on-ramp to the Internet. For even greater connectivity, the new Konica Minolta i-Option upgrade lets you browse the web from your bizhub control panel, adds new image control capabilities, increases your document security and expands the versatility and convenience of your bizhub workflow.

- ▶ **Web Browser convenience.** Access HTTP pages directly from your bizhub control panel, with simple-to-use navigation keys and PDF file preview with built-in Adobe Acrobat Reader LE.
- ▶ **Image Panel capabilities.** View multiple thumbnail pages, manipulate User Box documents, combine documents, move documents, restore changes and scan documents from ADF without storing them in your User Box.
- ▶ **Enhanced PDF encryption.** Increase the security of your documents with government-level AES 128-bit encryption – plus the ability to apply digital IDs and signatures.

- ▶ **Fully loaded for fast output.** Add the powerful FS-609 Booklet Finisher and PK-501 Punch Kit to your bizhub, and you'll be able to create 60-page folded booklets, stapled reports and presentations, hole-punched training manuals and more – in color, in house and on demand.

- ▶ **Banner printing.** With the optional FS-519 finisher installed, you can output full-color banners up to 11.75" x 47.25" – a unique bizhub advantage. There is even an optional MK-713 Paper Guide to easily feed banner paper.
